A long time ago, people didn't have modern clocks, so they used some simple tools to help them measure the time, but they were not very accurate. Years later, inventors began to search for better ways to measure time. One talented engineer, who loved to design new machines, spent years working in his small workshop. It was full of tiny gears, metal tools, and different pendulums.

The engineer studied how objects moved and how gears worked together. After many times of trying, he finally built a special clock. His design was beautiful and clever, and soon people from many countries wanted to see this new invention.

This amazing clock changed how people planned their work, travel, and daily life. It helped families organize their day better.

4 Read the text and answer the questions.

Omar is a young engineer who loves building small machines. Last month, he created a new gadget that works with clean energy. Before starting, he created a detailed blueprint to plan every part carefully. He wanted his invention to be simple and useful.

First, Omar assembled the small pieces using special tools. He connected wires and wheels. The machine runs on solar power, so it starts moving when sunlight touches it. Omar tested it in the school garden, and the wheels turned perfectly!

Omar loves inventing new things because it's a fun way to explore science and understand how energy can protect our planet. His next dream is to build a solar car for kids to ride safely in parks.

Sample Test (1)

Egypt has started new infrastructure projects in recent years. Skilled engineers are building modern high ways and bridges. The highways and bridges connect all parts of the country. Modern transportation systems in Egypt allow people to travel faster. Every new project improves Egypt's economy and makes it prepared for the future.

Sample Test (2)

Adam is a young engineer. He is talented. He makes an amazing invention-the solar robot gadget. He creates a simple gadget that feels like a small machine. The robot runs on solar-power.

Sample Test (3)

In the desert near Minya lies Tuna el-Gebel, a mysterious burial site that has amazed archaeologists for years. The area is famous for its underground chambers and long corridors filled with ancient art. Researchers made many exciting discoveries including hundreds of mummies.

Sample Test (4)

Long ago, people used the sun and sand to tell the time. Later, clever inventors built the first clock that used gears and a pendulum. The pendulum which moved slowly from side to side, helped the clock keep time more accurately.

Sample Test (5)

In the future, people will travel in easier and cleaner ways. Many new vehicles are becoming eco-friendly, which means they do not harm the environment. For example, electric buses and trains use less fuel and make less noise. This helps reduce pollution in cities and keeps the air fresh for everyone.

Sample Test (6)

Lily was a young artist who loved to draw. She went to a big art gallery. She saw huge paintings on a canvas. She loved a strange, colorful sculpture there. She felt very inspired at the end of the visit.

Sample Test (7)

The Giza Metro is now faster and cleaner than before. New trains that open and close automatically. Inside the train, there are big digital screens. They show the next station and the time. You can also hear clear announcements in Arabic and English.

Sample Test (8)

People visit the museum to see ancient treasures and statues. They learn about the history of Egypt. The museum has many beautiful halls and galleries. Visitors can see the golden mask of King Tutankhamun.

Sample Test (9)

Wadi El-Hitan is a magical place in the Western Desert. It is also called the Valley of the Whales. Millions of years ago, this area was covered by a very big ocean. Archaeologists have discovered hundreds of fossils of ancient whales that once swam here.

Sample Test (10)

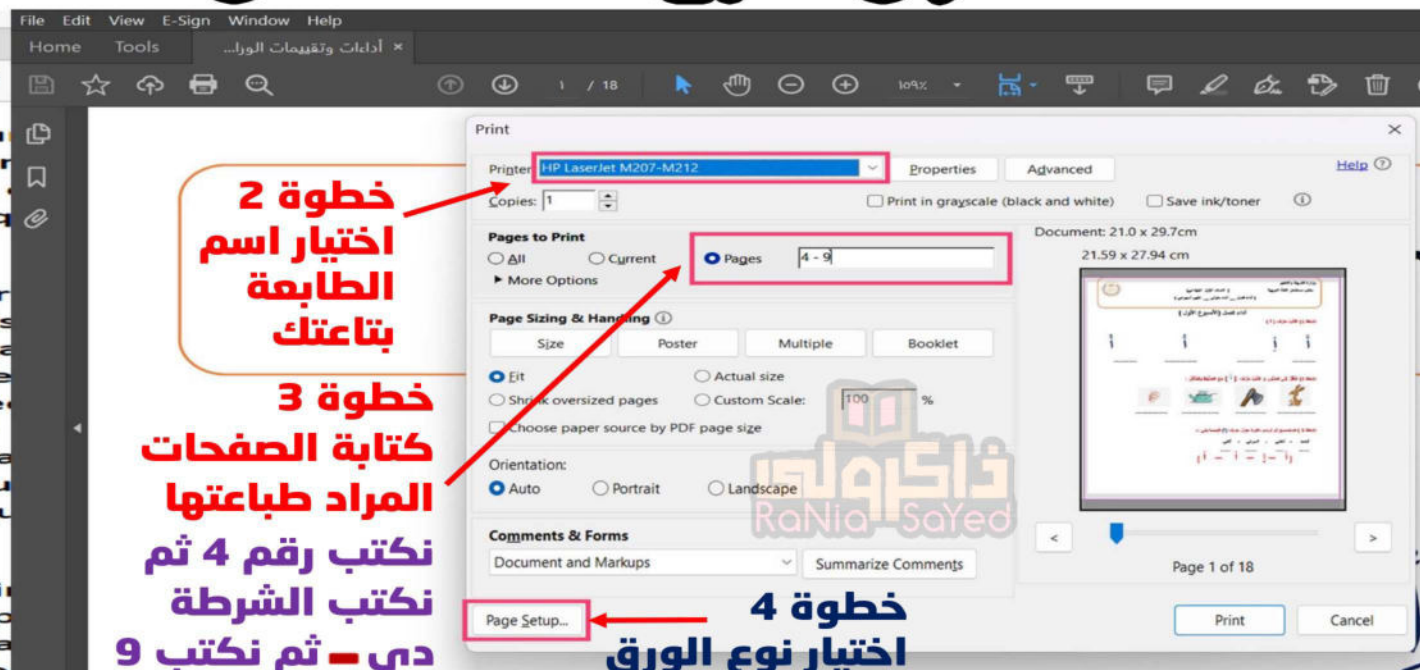

In the past, Egypt used to depend mostly on farming, and most people worked in fields or small local shops. There weren't many factories, and people didn't use to have machines to make goods quickly. Today, Egypt has developed many new industries.

 Subject: Modern transportation in Egypt
 Dear Rana,
 How are you and your family? I want to tell you about modern transportation in Egypt. Egypt is improving transportation with new systems like the monorail. It connects important places quickly. The monorail is a train that runs on a single track above the ground. At each station, passengers will find, digital screens and announcements. The Electric buses will help the environment because it runs on electricity. People will pay by cards or phones. See you soon.
 your friend,
 Hany

"Egypt's Modern Infrastructure Projects"

Egypt has built many highways, bridges, and tunnels to improve transportation and connect all parts of the country. These projects make daily life easier by allowing people to travel faster and transport goods efficiently. Cities, towns, and villages are closer than ever. Modern infrastructure supports economic growth and shows how Egypt is developing for the future. These projects make Egypt a stronger and more connected nation.

Tests

1. The Solar Sky Glider is a light plane that runs entirely on solar energy. It can travel from Cairo to Alexandria in just 20 minutes. The glider does not need fuel, is very fast, and has an autopilot system. Another new transport, the Nile Hydro Rail, is a magnetic train that floats above the water, moves quickly, and produces no pollution. Both of these innovations show how Egypt is using clean technology to improve travel.

Listening Scripts

- 2.** In the future, Egypt will have faster, cleaner, and smarter ways to travel. Underground electric trains will connect cities in just minutes, and self-driving buses will carry passengers safely. These vehicles will use renewable energy to reduce pollution. Stations will have digital signs in English and Arabic. Passengers will pay with smart cards or mobile apps, and streets will be less crowded. Technology will also make travel easier and more comfortable for everyone.
- 3.** The Luxor Temple is an ancient Egyptian complex located in the heart of Luxor. It was built to honor the god Amun-Ra and Egypt's famous pharaohs. The temple is known for its enormous statues, tall stone pillars, and colorful hieroglyphs. Visitors can enter through its large gates and imagine ceremonies in ancient times. Today, it remains one of Egypt's most impressive historical and cultural landmarks.
- 4.** In the past, most Egyptians worked in farming or small local shops. Factories were few, and machines were not widely used to make goods. Today, Egypt has many modern industries, including textile factories that produce clothes for local and international markets. Engineers use solar and wind power in modern facilities, and new roads and bridges help the country grow. Egyptians are proud of their industrial progress.
- 5.** Egypt has many fascinating places to explore, from green oases to ancient desert temples. One special site is Deir el-Medina, where ancient artists once lived. Visitors can walk through the villages and tombs, see beautiful wall paintings and carvings, explore desert trails, and take photos. It is located in Luxor, southern Egypt, and is best visited from October to April when the weather is pleasant.

Listening Scripts

6. In Egypt's remote Western Desert, there is a fascinating place called Wadi El-Hitan, or the Valley of the Whales. Millions of years ago, this region was covered by a huge ocean. Archaeologists have discovered many whale fossils, some over 15 meters long, showing incredible bone details. Visitors can walk along desert trails and see the fossils in their original place. Egypt protects this site carefully as a world heritage location.
7. The Aswan High Dam is a massive structure in southern Egypt that supports people every day. Engineers built it to control the Nile's floods and produce electricity for homes and industries. Made of concrete and stone, the dam stores water for farming all year. It protects nearby villages and provides a reliable supply of clean energy. The Aswan Dam remains one of Egypt's most important modern constructions shaping the country's future.
8. The Grand Egyptian Museum is a popular place where people explore ancient treasures and statues. Visitors can see the golden mask of King Tutankhamun and many other famous artifacts. Students and tourists watch educational videos and participate in workshops to learn how ancient Egyptians built temples. After their visit, families enjoy meals in the garden cafe, take photos, and talk about the amazing exhibits they have seen.
9. Today, we meet a young engineer with an exciting invention — a solar-powered robot kit. The engineer designed a detailed blueprint before assembling the small parts using proper tools. The robot runs entirely on solar energy, and its wheels move when placed in sunlight. Visitors can test it and improve it easily. This kit is a fun way to explore technology and new ideas every day.
10. In the desert near Minya lies Tuna el-Gebel, an ancient burial site that has amazed archaeologists for many years. The site is famous for its underground chambers and long corridors filled with carvings and colorful paintings. Researchers discovered hundreds of mummified animals, especially birds. In the center stands the tomb of Petosiris, a high priest. Walking through Tuna el-Gebel, visitors feel like they have traveled back in time.

Making cloth was a very important part of ancient Egyptian life. The main fabric they used was linen. Linen came from plants that grew near the River Nile.

Egyptians used simple wooden looms to weave the linen. This job needed great skill. First, they put thin threads onto the loom. Then, the weaver worked carefully to make a pattern by weaving the threads up and down. They used this fabric for clothes, boat sails, and wrapping mummies. Today, we can still see these old looms and the linen cloth in museums, which is a wonderful discovery of their heritage.

General Tests

Test 1

- Listen and write (T) True or (F) False:

The artist used to work in his studio every day. He loved to paint colorful murals and paintings on canvas. He used to mix his own colors on a palette with a paintbrush. He didn't use to listen to music while he worked, because he needed to focus. His final piece of art showed great talent and creativity. He used to say that art was never boring or difficult.

Test 2

At the smart station, passengers can buy tickets from a ticket machine. They see train times on digital screens. There are elevators for people with bags and escalators for others. Announcements tell passengers when the train arrives. People must keep the station clean and must not leave trash. This makes travel easy and pleasant for everyone.

The station is part of Egypt's modern transportation.

Test 3

Omar is a talented student who loves art. For the school project, he decided to create a sculpture. He used wood and special tools to carve a figure. He worked with great skill to make the surface smooth. His teacher said his work was creative and impressive. Omar felt very proud. He will display his artwork at the school exhibition next week for all the visitors to see.

Test 4

The ancient Egyptians created an amazing invention called the loom. The loom was a huge wooden machine used to make cloth and blankets. The process required great skill from the workers. They used to move threads up and down to build fabric. This loom inspired the modern machines that make our clothes today. It was a very useful creation for the whole country.

Test 5

The school storage room was a messy place. Piles of old textbooks were placed on the floor. Everything was covered with a layer of dust. The heavy metal door would creak loudly every time it opened. A sign read: "Volunteers needed to organize this room!" They needed to clear the path, which was almost clogged with broken furniture and old equipment.

Test 6

Many new vehicles are becoming eco-friendly, meaning they do not harm the environment. They use renewable energy to power their transportation. Renewable energy comes from natural sources like the sun and wind. It never runs out and is much better than petrol or diesel. If countries use renewable energy, they can protect Earth for future generations.

Test 7

New Mansoura is a modern coastal city in northern Egypt. It lies on the Mediterranean coast and has wide walkways and green parks. The city has tall buildings, shopping centers, and cultural areas. It combines modern life with natural beauty. New Mansoura provides homes for many Egyptians and attracts tourists. It reflects Egypt's vision for progress and development. The city is a lively and attractive place for families.

Test 8

In the past, people depended on farming. Today, Egypt has developed many industries. The textile industry produces clothes and fabrics. The steel industry helps build roads and bridges. New power sources like solar energy are used. These changes make Egypt more self-reliant. Factories create jobs for people. Egypt's economy is growing stronger.

Test 9

A famous archaeologist made a big discovery at an enchanting site in the desert. It was a mysterious tomb with long underground corridors. The tomb walls were covered with amazing carvings and scenes. Inside a special chamber, they found hundreds of mummified animals. A researcher said the tomb helps us travel back in time. This unforgettable heritage makes Egyptians feel proud.

Test 10

The Temple of Dakka stood for a long time in Nubia. It became a symbol of Egypt's long history. The temple used to be close to the Nile River. To protect this treasure, Egyptian experts had to move the structure to higher ground. Roman emperors used to add new carvings to the temple over time. Now, visitors can walk through the tall gate.

Test 11

Egypt is working to develop its economy and become more self-reliant. The country now manufactures many high-quality products, contributing to growth. New power supplies like solar and wind energy are used to create clean power for factories and homes. This innovation helps the country grow stronger. The new industrial zones reflect a modern approach to development.

Test 12

A clever student wanted to create a talking robot. She drew a blueprint with all the parts. Then she started to assemble the machine. She used small tools to

connect the wheels and voice box. Her invention could run on solar power. After testing, the robot said "hello!" This exciting gadget was her best creation. She felt very proud of this useful product.

Test 13

At the ancient temple, visitors can see amazing carvings on the walls. These carvings tell stories about Egyptian gods and rulers. A tour guide explained the patterns and their meanings. The temple is near the border of Nubia. Experts worked to restore the beautiful artwork. Everyone should appreciate this important part of history. It shows the skill of ancient artists.

Test 14

Nora visited the Grand Egyptian Museum with her class. She saw many ancient artifacts and treasures. The golden mask was her favorite. She learned about the history of the pharaohs in a large hall. Nora and her friends joined a workshop where they learned to create patterns on clay. She felt very inspired by the trip. Nora told her mother she wishes she could be an archaeologist when she grows up.

Test 15

The Aswan Dam is a huge structure in southern Egypt. Engineers built it to protect the land from the Nile flood. The dam is made of strong stone and concrete. It was built to generate powerful electricity for homes and factories. The dam gives Egypt a clean supply of power. This modern building completely changed Egypt's future
